

Introduction

Founded in 2018, **Qutek** Technology Limited, is an organization that combines the use of medical science with technology to provide Smart Healthcare products. We aim to build innovative solutions which enable our customers to lead a better, smarter, healthier life.

Our primary focus is to integrate smart technology into the personal healthcare and wellness regime of people's daily lives. So far, Qutek has designed many smart gadgets that can elevate the quality of life and promote better health.

Our products include smart body composition scales, smart sonic toothbrushes, bedwetting alarms, and smart neck massagers. We cater to adults as well as children. **Qutek** has global presence and reach customers around the world.

Vision

Our vision isn't just about building a better world. We also strive each day to combine **big data analytics, data security, artificial intelligence, and machine learning** to create solutions that can streamline human existence.

Mission

Our mission is to transform your health and lifestyle by **changing the way you handle your healthcare routine**. We believe healthy habits shouldn't be a reaction to things when they go wrong. Rather, you should already be taking small steps to lead a healthier lifestyle.

The greatest wealth
is health

Our Products

Product development is an ongoing process at **Qutek**. We encourage our employees to think out of the box and develop solutions that can allow our customers to lead a healthy lifestyle. We adopt eco-friendly practices for the development of our products. All our products are FDA, CE, and ROHS certified as well. Currently, our product portfolio comprises the following:

13 Essential health index measurements

STEPS Body Composition Scale Premium

- The STEPS Body Composition Scale is a smart scale suitable for the whole family. Composed of Indium Tin Oxide, this premium scale comes in a luxurious design.
- It is a user-friendly device that allows you to measure 13 health index statistics.
- The scale utilizes state-of-the-art core Dual BIA technology. It has 4 super sensors for detecting body weight and can be paired up with iOS as well as Android devices.
- The smart app designed for this device can connect your real-time body metrics to a world of data charts. You can also use it to share your health journey with your social circle and keep track of your fitness goals.

STEPS Body Composition

- The STEPS Body Composition scale is like our premium device discussed above.
- The key difference is that it can allow users to measure 9 health index statistics. This device also employs the use of core Dual BIA technology and is compatible with iOS and Android devices. Like the premium scale, the smart app for this device allows you to connect your real-time body metrics to a world of data charts, engage in social sharing, and track your progress.

DENTiCARE Smart Sonic Toothbrush

The DENTiCARE Smart Sonic Toothbrush is a smart sonic toothbrush, designed to promote dental health. It is equipped with 5 modes that can help you meet your dental needs and improve your brushing skills. This device has been clinically proven to improve gum health within 14 days. It is compatible with iOS and Android devices and is capable of performing 40,000 brush strokes in 60 seconds. The smart app that comes with this device can also detect 16 brushing zones in real-time. It comes in two colours, black and white.

PEEPiYA Bedwetting Treatment Solution

- The PEEPiYA Bedwetting treatment solution is a wearable bedwetting alarm.
- It makes use of smart technology and prevents nightly bedwetting incidents.
- This device does not employ any invasive techniques. Instead, it is equipped with moisture sensor clips that can be tucked within a child's pyjamas.
- These sensors are capable of triggering an alarm when they get wet.
- The device is rechargeable and does not cause any discomfort to the child.
- It can also be used by adults experiencing night enuresis problems.

VERY EFFECTIVE

MagiCure Neck Massager

Qutek's MagiCure Neck Massager is a smart cerebral vertebrae massager. It has a streamlined, ring-shaped design that fits over the human cervical vertebra curve perfectly. The device operates via four functions which include a low-frequency electric pulse, magnetic effect, infrared heating, and circular traction. These induce pain-relieving effects by reaching into the body's deep tissues and marrow. It can help cure neck pain, numbness of shoulders and arms, headaches, and vertigo. This device is particularly useful to promote local blood circulation, relax local muscles and relieve fatigue. It also allows the user to maintain a proper body posture. You can choose between two automatically combined electric pulse modes and four manual modes. Its Far Infrared heat moxibustionfeature allows you to select between low, medium, and high-grade options, as well. You can operate it using a wireless remote control and LCD.

WELLBEING

16 EMS intensity levels

- 01
Level 5-1 comfortable
(Suitable for daily neck massage)
- 02
Level 10-6 moderate
(Ideal for reducing neck stiffness and fatigue)
